

The All Environment Precipitation Gauge II is Belfort's latest introduction to our Industry Standard line of precipitation gauges. Designed for cost effective highly accurate all weather precipitation measurement this gauge has been extensively tested at NOAA and CRN test sites. AEPG boasts accuracy of 0.25mm over the operating temperature range of -40°C - +50°C at precipitation rates of up to 304 cm/hour. Available in NWS standard 8" diameter or WMO standard 200 cm² heated collection orifice in 600mm and 1000mm capacity utilizing THREE redundant vibrating wire transducers to ensure maximum up-time. RS-232, RS-485, or pulse output connects to any datalogger.
